Spain is one of the most popular tourist destinations. English tourists, Germans and Americans choose the Spanish coast for their holidays. But Spanish tourism does not only live from foreigners. The crisis has caused many Spaniards to choose a national destination for a few days escape to the beach.

Therefore, and although we are in February, many people have begun to plan their **holidays** in these months.

Today we discover one of the most spectacular sights of Spain: **the Canary Islands**. Discover this region and specifically the island of Tenerife, with Florida Plaza Apartments.

¿Why apartments?

When we travel, we always wonder: should we stay in a hotel or rent an apartment? It is true that hotels give you a wealth of amenities, but apartments offer you independence at your own pace.

Being able to get up when you want and the ability to cook when you wish, are two of the pleasures that you deprive yourself if you choose to spend your holidays in a hotel.

In an apartment there are no hours, you can enjoy the freedom to do things at your own pace. This will allow you to take things more calmly and achieve greater relaxation on your days off.
